Burpee's Spring Blooming Crocus

Crocus will grow in many places—in the lawn, in flower borders, in rock gardens, edge of shrubs, on the slopes of terraces, in sun or shade, and even under trees. The best position is where they will receive the sun for only part of the day.

For showy effect plant bulbs in masses 3 to 4 inches apart. For mass effect in borders set bulbs in double rows 6 inches apart. Such ribbon plantings are very pretty and greatly admired.

In our advertisements this year we are making a special offer of Crocus Bulbs. We want every customer to know of this sensational offer, so we repeat it here,

12 CROCUS 10¢

Beautiful Flowers in Early Spring

are assured by planting Burpee's Bulbs this fall. Often before the snow is gone, Snowdrops, Crocus, Chionodoxas, Scillas, etc., are in flower, followed by Hyacinths, Daffodils, and Tulips until the end of May. It should be

remembered that these bulbs must be planted in the fall. They cannot be had at any other season of the year. In addition to outdoor planting, they are ideal, easily grown subjects for winter blooming in the house.

Jonquils and Campernelles

Jonquils and their hybrids have a grace and charm that make them extremely popular. The blooms are borne in clusters on top of a strong, tall stem. All are brightly colored and very decorative, as well as sweet scented. They have long, grass-like foliage and belong to the rush-leaved variety of Narcissus. Some gardeners apply the name Jonquil to the large trumpet Daffodils, but this is misleading. The sweet fragrance of the Jonquils and Campernelles makes them very desirable for garden decoration and for cutting.

Golden Sceptre

9483 Golden Sceptre

A medium-sized perfectly built flower of deep Jonquil-yellow, 3 inches or so in diameter, the perianth star-shaped, just a shade lighter in coloring than the trumpet, which is slightly rolled and flaring at the mouth. The whole flower, as with the others in this class, is of the greatest substance, keeping in perfect condition exceptionally long both in the garden and when cut. 3 for 30¢; 12 for \$1.00; 100 for \$7.50.

Paper White Narcissus

How to Grow Narcissus and Daffodils and when to plant them

For the most satisfactory results, plant Narcissus Bulbs as early in the fall as they can be obtained, because if planted too late, they will not have time to produce sufficient root growth, which is essential to good top growth and flowers in the spring. The bulbs are planted 4 to 8 inches deep and 6 to 10 inches apart according to the size of the bulbs. Planted by themselves in clumps of a dozen bulbs, they are very showy along with your other plants, while a large bed of nothing but Daffodils is very showy. They are especially well adapted for naturalizing. In very cold locations after the ground is frozen hard, cover with leaves, straw or coarse litter from 4 to 6 inches deep.

For house culture in flower pots plant just close enough together so that the bulbs do not touch one another. With the exception of the Rock Garden varieties listed on this page, almost any of our Narcissus or Daffodils may be grown indoors as well as outside. Should further planting directions be desired, ask for our Free Leaflet No. 31—"Bulbs for Winter and Spring Blooming."

Giant Breeder Tulips

Magnificent Large Blooms in Beautiful Art Shades

Breeder Tulips are of the same tall, stately growth as Darwins, require the same culture, bloom at about the same time, but come in colors not found in that class or any other class of Tulips. Their rich and unusual blendings of purple and old gold, bronze and terra-cotta, brown and violet, buff and maroon, are most attractive. These so-called "art shades" put Breeders in a class by themselves. Enormous, graceful, showy blooms, many of them sweet scented. All are splendid for cutting and should be included in every garden display. They flower when the Single and Double Earlies are over.

9253 Abd-el-Kadir Beautiful antique bronzy yellow shading to light bronze at edge of petals; inside bronze-brown, olive-green base. This combination of colors is beautiful and most interesting. A splendid variety to use with other bronze and brown Breeders; 30 inches. 3 for 30¢; 12 for 95¢; 100 for \$7.25.

9252 Apricot A lovely ruddy apricot tint edged bronzy buff with yellow base and olive-green halo. Glorious large blooms tending to have an extra number of petals and sometimes more than one flower to a stem; 28 inches. 3 for 30¢; 12 for 90¢; 100 for \$6.75.

The blooms, while not especially large, are most attractive; 28 inches. 3 for 30¢; 12 for 90¢; 100 for \$6.25.

9257 Cardinal Manning (Goliath, King's Court) An odd pastel wine-red flushed rosy bronze, changing to rosy violet shaded bronze when in full bloom. A most impressive and stately variety, widely grown on account of its quaint yet beautiful color. Shows off best when planted by itself; 28 inches. 3 for 30¢; 12 for 90¢; 100 for \$6.75.

9259 Cherbourg Old gold shaded light bronze. Large egg-shaped flower of great beauty. This is one of the most attractive of all the Breeders, the unusual combination of colors, with an ever deeper tone of yellow growing stronger towards the edge of the petals, gives a distinctiveness to the flower that is seldom equalled; 32 inches. 3 for 65¢; 12 for \$2.25; 100 for \$16.00.

9260 Dillenburg A glorious salmon-orange shaded rose. Large flowers of great beauty. The blooms are of perfect shape and are carried on long, strong stems. Fine for cut-flowers or for the garden; 27 inches. 3 for 50¢; 12 for \$1.80; 100 for \$13.00.

May-Flowering or Old English Cottage Tulips

Avis Kennicott

Generally speaking, the most permanent of all Tulips, blooming in early May after the Early Singles have passed, hence the name of "May Flowering." The term "Cottage" is of recent origin and so called because so many were planted around the country homes and cottages of England. As a class they are rich in the more delicate and artistic shades of yellow, orange, fawn, salmon, old rose—colors missing to a great extent in other classes of late Tulips. They are as varied in their range of colorings as the Darwins but more varied in form, being mostly long and oval-shaped, many with gracefully reflexed petals. Stems are long and not as stiff as the Darwins or Breeders. Excellent for cutting and unsurpassed for garden decoration and especially for grouping among shrubbery. Except for a few varieties, they are not recommended for growing indoors but should be handled the same as Darwins.

9206 Alaska Pure golden-yellow. Lily-flowered type with slightly reflexing outer segments. Flower long in shape and very attractive; 24 inches. 3 for 30¢; 12 for 95¢; 100 for \$7.25.

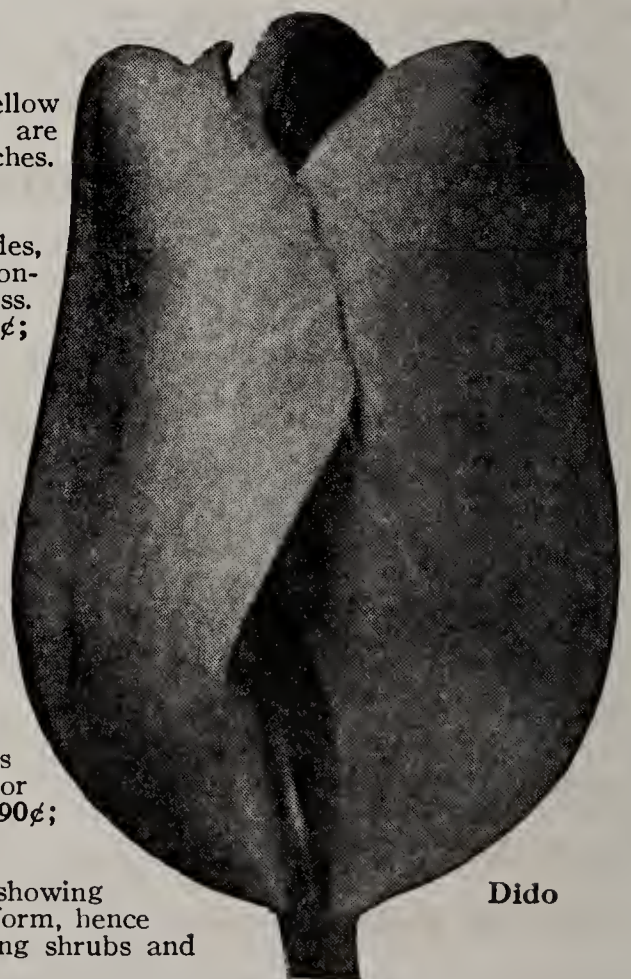

9202 Ambrosia Salmon-orange shaded bronze and lilac-rose; inside vivid orange changing to light tan as the flower ages; yellow base edged green. An interesting and very beautiful combination of colors that commands attention whenever seen. One of the loveliest in the garden or when cut; 24 inches. 3 for 30¢; 12 for 90¢; 100 for \$6.75.

9200 Arethusa Rich soft yellow shading almost to ivory in the center and base of the flower. Each petal edged bright lemon-yellow; inside pale lemon-yellow. Large, well-formed, urn-shaped flowers of the true Cottage type. A new variety, greatly admired for its size, lovely form and fine erect stem. Perhaps the best of all light yellow tulips; 27 inches. 3 for 30¢; 12 for 95¢; 100 for \$7.25.

9201 Argo Fine for indoors as well as in the garden. Golden yellow mottled red, changing to reddish brown. This color blends nicely with almost any other color grown, particularly with the lighter shades; 22 inches. 3 for 30¢; 12 for 90¢; 100 for \$6.50.

9203 Avis Kennicott A beautiful bright chrome yellow with dark base and anthers. The decidedly elongated flowers grow to an immense size. One of the finest and brightest yellow Cottage Tulips. Highly valued for garden display and cutting; 24 inches. 3 for 30¢; 12 for 90¢; 100 for \$6.75.

9204 Buff Beauty Salmon-rose with petals edged buff on inside. Bud opens scarlet with yellow band. Large, graceful and very fine and should be planted by everyone wanting a Tulip with a distinctive color. A bouquet of Buff Beauty is wonderfully attractive; 20 inches. 3 for 30¢; 12 for \$1.10; 100 for \$7.75.

Early Single and Early Double Tulips bloom from two to four weeks earlier than other varieties, and for that reason have always been great favorites for garden display and for cutting. They are equally at home in formal beds or when planted in clumps in the perennial borders. Mostly used for bedding out-of-doors, although they are also unequalled for blooming indoors during the winter.

Burpee's Showy Hyacinths

*Mammoth Size Bulbs
for Forcing in the House
or Planting in the Garden*

Hyacinths are easily grown out-of-doors in beds or borders. Plant the bulbs from 4 to 6 inches deep, according to the texture of the soil. Protect during the winter with a 3-inch layer of straw, leaves, or coarse manure to prevent alternate freezing and thawing of the soil. This covering should be removed promptly with the first warm days of spring. Large beds of Hyacinths always make a fine showing, and clumps of 6 or 8 among the shrubbery or in the perennial border are equally attractive. These Mammoth Size Bulbs are also fine for growing indoors during the winter in pots or pans of soil, or in special Hyacinth glasses filled with water.

9001 Duke of Westminster

An Unusually Fine Selection of this Most Charming Flower

We confidently recommend Duke of Westminster as one of the finest Hyacinths grown today. The prevailing color is deep purplish blue with large spikes well filled with bells of rich **purplish blue** with a light center. Equally valuable for forcing and bedding.

9004 Enchantress A lovely variety with attractive long-stemmed flower-spikes. The individual bells are closely set on a strong stem. They are a beautiful **light delft-blue** shaded with somewhat deeper blue. Valuable for garden display and for forcing.

9006 Gertrude Magnificent compact trusses closely set with rich **carmine-rose** bells. This is the favorite variety for outdoor bedding because the plants make a splendid uniform growth and bloom all at one time. Easily forced.

9007 Grand Maitre A glorious spike of large bells closely set on a long and strong stem. The color is a rich **deep porcelain-blue** of unusual appeal. Grand Maitre is equally well suited for outdoor growing and for forcing.

9009 King of the Blues Those who admire rich deep shades will be particularly pleased with King of the Blues. It is, in our opinion, one of the best belonging to the **deep blue** class, with elegant, long and graceful spikes.

9014 Lady Derby Clear rich **rose-pink** blooms forming a solid and strong spike of color. Grown indoors, the flowers are a shade deeper in color.

9012 La Grandesse An elegant spike closely set with beautiful large bells of a clear waxy **white**. It is a splendid variety for forcing.

9019 La Victoire One of the earliest of all Hyacinths to come into bloom. The flowers are a brilliant **scarlet-red**. When grown indoors, they have a tendency to be lighter.

9023 L'Innocence Elegant large **white** bells gracefully arranged on a strong, heavy stem. It makes a beautiful display and is easily forced.

9016 Lord Balfour An early-flowering Hyacinth and one of the best in its color class. The large, well-formed flowers form a solid truss of **lilac-rose**, shaded dark violet.

9033 Queen of the Pinks A particularly lovely **rose-pink**, forming large broad trusses closely set with good-sized bells. Strong stemmed. Fine for bedding and valuable for late forcing.

9031 Yellow Hammer A good deep shade of **creamy yellow**. Yellow Hammer is easily forced and gives elegant long showy flower-spikes. Also suited for outdoors.

Any of the above desirable varieties we offer at the uniform price of:

23¢ each; 3 for 60¢; 12 for \$2.20; 100 for \$15.00.

The First Flowers of Spring

The early spring flowers always have had a particular appeal to gardeners. Though they are not large, they seem to mean so much to us because they are the first ones. Plant them plentifully: Snowdrops, Scillas, and all the others listed on this and the following pages. Plant some Chionodoxa this year too. They make a splendid show, are perfectly hardy, and will last almost indefinitely. Fritillaria, Grape Hyacinths, and Scilla are seen far too seldom. We know you will like them. And be sure to include some of the Dutch and Spanish Iris and also a few of the Anemones.

Anemone

The varieties of Anemones listed below are all large flowering. They are hardy and will bloom profusely next year if planted this fall.

8904 The Monarch Large blooms on strong stems. Includes pink, rose, purple, lavender, etc. Cover bulbs 2 to 3 inches deep. 3 for 25¢; 12 for 80¢; 100 for \$5.75.

8969 Poppy-Flowered De Caen Of strong growth and very free blooming. Bright and showy colors. Blooms early in the spring and prefers moderately moist soil. 3 for 25¢; 12 for 70¢; 100 for \$4.75.

8924 His Excellency A single flowering variety with large blooms of a brilliant Poppy-scarlet color. This sometimes is called Hollandia. The plants make a vigorous growth and bloom profusely during the spring and early summer. Entirely hardy. 3 for 25¢; 12 for 70¢; 100 for \$5.00.

8909 St. Brigid Beautiful semi-double and double blooms in many showy and bright colors. This is a spring-blooming variety needing some winter protection. 3 for 25¢; 12 for 70¢; 100 for \$5.00.

Brodiaea

9497 Mixed Colors Bulbs are small and produce grass-like leaves with flowers borne on long, slender stems. Flowers are produced in clusters, wax-like in texture, very pretty, and last well either on the plant or when cut. Grow 15 to 20 inches high. Do well in semi-shade or in the rock garden in crevices of rocks. 12 for 70¢; 100 for \$4.75.

Calochortus

Mariposa or Butterfly Tulip

The word Mariposa means butterfly in Spanish and is a fitting name for these gorgeously colored flowers with their butterfly-wing-like spotted petals. Flowers are cup-shaped and of delicate colors, many marked with dots and pencilings, and as exquisitely lovely as an orchid.

9382 Clavatus One of the largest; rich golden yellow, without markings.

9384 Luteus Lemon-yellow which occasionally comes white, finely penciled and marked on the inside.

9386 Splendens Clear, unspotted lavender with often as many as thirty flowers to a stem.

9388 Venustus A wide range of colors from white to purple, all marked, penciled and spotted.

Any of the above four varieties:

12 for 80¢; 100 for \$5.75

9389 Mixed Colors All the above and many other gorgeously colored varieties in a fine assortment. 12 for 70¢; 100 for \$4.75.

Chionodoxa—Glory of the Snow

9480 Luciliae Deep blue flowers with a white center. This is a beautiful flower and showy wherever planted. Well-established bulbs furnish a number of flower spikes which carry 4 to 6 blooms each. Plant the bulbs 3 inches deep and 2 inches apart in various locations throughout the garden, particularly in the rockery. They will provide a showy display for many weeks if planted in different exposures. 12 for 45¢; 100 for \$3.00; 1000 for \$25.00.

9481 Sardensis Intense bright blue with a lighter eye. A delightful companion to above, which when planted together make a pleasing contrast. Flowers increase in size each year and should be planted in all rockeries and perennial gardens. 12 for 45¢; 100 for \$3.00; 1000 for \$25.00.

Perennial Flower Seeds

Perennials are the chief stand-by of the old-fashioned gardens. They require little attention and respond generously to increased care and thorough cultivation. After once being established they will not only last many years but also increase in beauty with every season. The seed of perennials may be sown outdoors almost any time of the year.

Summer and fall sowings should be made in specially prepared beds, preferably boxed in with 8- or 10-inch boards and covered with a screen of lath or wide-meshed burlap. During the winter a covering of leaves or strawy manure, after the frost has touched the foliage, is all the protection needed to carry the plants safely through the winter.

24F54 **Oregon Giants**

This strain of Pansies, which originated in Oregon, distinguishes itself by being extra long stemmed. The flowers are somewhat more flattened than those of other Giant Pansies, but this characteristic adds considerably to the size of the blooms which, if well grown, measure 4 in. across. Pkt. 50¢; 1/16 oz. \$1.25; 1/8 oz. \$2.25; 1/4 oz. \$4.00.

24F58 **Sunnybrook Giants**

This magnificent new strain of Giant Pansies is outstanding for its range of colors, compact growth, and free-blooming character. The flowers contain an unusual amount of petal substance, so that the petals are not only thick but waved and frilled to the extreme. Pkt. 40¢; 1/16 oz. \$1.00; 1/8 oz. \$1.75; 1/4 oz. \$3.25; 1/2 oz. \$6.25; oz. \$11.75.
